

Ag Education Focuses on Youth 5-8 years old

Because many enjoyed Ag Education in the former Vegetable Barn in 2019, it will be offered again this year. This area will focus on youth 5-8 years old in addition to offering educational opportunities for all ages. Several stations are being planned with hands-on learning. Some include milking a cow, chickens, maple production, live rabbits, honeybees, a corn box, horses, and more!

Supervision will be the responsibility of all parents and adults visiting the building. The fair board wants this area to be a fun, educational space, but will need the assistance from all to keep it tidy, safe, and a great learning experience.

Note: All former vegetable barn entries will be entered and displayed in the Elementary School Gym.
