

# Blue Ridge Community College's Transportation and Logistics Simulation Trailer

This **state of the art equipment** offers real training opportunities for both students at BRCC and **future students**. It serves a very useful purpose in helping students achieve some of their career goals but is also effective at offering potential future students the opportunity to drive, back up and maneuver a **tractor trailer** in a variety of conditions and circumstances. The heavy equipment simulators are authentic **CAT** controlled and with multiple machine options available, students can gain valuable experience on **bull dozers**, **excavators** and a variety of **bucket loaders**. This is all done **risk free** in a **very safe** and controlled environment.

BRCC is excited to participate  
in the 2023 Highland County  
Fair and intends to have the  
simulation trailer at the  
event each day!
